Description

SAWIUS Ltd. production program plastic - PS, OPS, PVC and PET with foil stock - is aimed at the production of wrappers and his development.

The production happens on the thermo machines Canadian G.N. Plastics Company Ltd and ILLIG. The firm's business administration and his production expand gradually during the time, our product range widens, our connections' range expands continuously.

Renovated production hall and storage premises, meeting the strictest international hygiene, quality and safety standards, as required by the food industry and essential to our customers. Our production capacity are gradually widening with the growth of inquiry and with the closed contracts.

SAWIUS s.r.o. has 41 employees currently, from this 30 heads work in the production directly.

At our product range can be found sweet deposits, biscuit trays, lettuce jars, confectionary industry and all kinds of plastic packaging which can be hit on the other area of a life, boxes which can be locked with a roof and blisters. Our interesting product line the 2 ml 50 ml spreading plastic phials.

The seat of the production can be found between Komárom and Gyalla (Hurbanovo) lying Zöldállás (Zelený Háj).
