Bilateral Meetings

- (13.00 pm - 18.00 pm)

Description

Darno-Meat processor company of Funkció Ltd. was founded in 1995. We are processing 80-100 pieces of halved pigs daily. Our product range was extending continuously year by year. We are producing mainly pork products together with horse and deer sausage, chicken and turkey breast ham. We have customers in England, Belgium, Germany, Austria, Czech Republic, Slovakia, Romania but bigger part of our partners are Hungarian. We have 3 different product families winning Hungarian Product Prize (called "Source of health", "Past cited" and the liver pastes). All of our products are produced with sea salt and most of them are free from allergens (except chitterlings and products produced with cheese) so we support **health-conscious cosumers**. Our mission is to reach as many people as we can with our high quality products. We are looking for distributors who can help us to achieve our collective goal.
