HESI Bakeries Production Ltd.

<http://www.hesi.hu>

### **Bilateral Meetings**

- (13.00 pm - 18.00 pm)

#### **Description**

The HESI Ltd. has operated as a traditional bakery in the region in the form of company since 1993. In the course of its activity its work is characterized by ongoing technical and product development, enterprise innovation and the pursuit of constant renewal.

The company is currently engaged in production activities in Eger and in Bélapátfalva. The delivery of daily and the long lasting products is carried out by its own car park. The transport of the chilled and quick-frozen products and export products are carried out by external partners.

There are a selection of various modern leavened bread, bakery products, fine pastries, bread crumbs and fresh and quick-frozen pastries. Among these stands out the manufacture of strudel pastries that in itself means 25 products.

The competitiveness of the company is helped by the annually audited IFS quality management system (with high level ranking). Annually is replaced the significant part of the products that means the company puts always modern and more marketable products on the market.

The export plays a significant role within the production turnover. It's a good indication of the effectiveness that the volume delivered onto the Western European markets has continuously increased in the last two decades.

The HESI Ltd. as a dominant employer of the KKV sector (small and middle-size enterprises) has got an increasing turnover and number of employees for years.
