Bilateral Meetings

- (13.00 pm - 18.00 pm)

Description

The production area of DR HONEY® is the still intact **Tokaj- Zemplén Landscape Protection Area** and its surroundings. During the prudent processing we pay maximum attention to preserve the inner value of our honey.

At **DR HONEY®** we are beekeepers and descendants of beekeeping families. For the satisfaction of our consumers we ensure that our honey is derived exclusively from Hungary, it is not mixed with honey from any other sources. This guarantees that our consumers can have confidence in our honey collected from pure, **GMO free areas**.

Our HORECA sortiment includes: honeydew, acacia, silkweed and linden honeys.

We offer our single-flower **HORECA honeys in a 28 g glass jar**. It can be used for breakfast and for a morning or afternoon tea. It is always practical: one dose until the last drop.

In our retail sortiment you can find 6 type of **single-flower** honey and the widely used multiflower honey. Our **gourmet** honeys are niche product in the market, such as honeys infused with elder-flower, with mint leaves or lemongrass and also honey with apricot brandy or slightly roasted pumpkin seeds.
